I am responsible for the preparation of these annual financial statements, which are set out on pages 1 to 47, in terms of Section 126(1) of the Municipal Finance Management Act and which I have signed on behalf of the Municipality.

YN NDIMA Municipal Manager

ACCOUNTI	) LOCAL MUNICIPALITY NG POLICIES TO THE ANNUAL FINANCIAL STATEMENTS EAR ENDED 30 JUNE 2012
1.	Presentation of Annual Financial Statements
	These annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention unless specified otherwise. They are presented in South African Rand.
	A summary of the significant accounting policies, which have been consistently applied, are disclosed below.
	These accounting policies are consistent with the previous period.
1.1	PROPERTY, PLANT AND EQUIPMENT
	Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one period.
	The cost of an item of property, plant and equipment is recognised as an asset when: •it is probable that future economic benefits or service potential associated with the item will flow to the municipality; and •the cost of the item can be measured reliably.
	Property, plant and equipment is initially measured at cost.
	The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Trade discounts and rebates are deducted in arriving at the cost.
	Where an asset is acquired at no cost, or for a nominal cost, its cost is its fair value as at date of acquisition.
	Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset(s) given up.
	When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.
	Costs include costs incurred initially to acquire or construct an item of property, plant and equipment and costs incurred subsequently to add to, replace part of, or service it. If a replacement cost is recognised in the carrying amount of an item of property, plant and equipment, the carrying amount of the replaced part is derecognised.
	The initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located is also included in the cost of property, plant and equipment, where the entity is obligated to incur such expenditure, and where the obligation arises as a result of acquiring the asset or using it for purposes other than the production of inventories <b>10</b>
ACCOUNTI	) LOCAL MUNICIPALITY NG POLICIES TO THE ANNUAL FINANCIAL STATEMENTS EAR ENDED 30 JUNE 2012
1.1	PROPERTY, PLANT AND EQUIPMENT (continued)
	Recognition of costs in the carrying amount of an item of property, plant and equipment ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by management.
	Major spare parts and stand by equipment which are expected to be used for more than one period are included in property, plant and equipment. In addition, spare parts and stand by equipment which can only be used in connection with an item of property, plant and equipment are accounted for as property, plant and equipment.

Major inspection costs which are a condition of continuing use of an item of property, plant and equipment and which meet the recognition criteria above are included as a replacement in the cost of the item of property, plant and equipment. Any remaining inspection costs from the previous inspection are derecognised.

Property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses.

Property, plant and equipment is carried at revalued amount, being the fair value at the date of revaluation less any subsequent accumulated depreciation and subsequent accumulated impairment losses.

Revaluations are made with sufficient regularity such that the carrying amount does not differ materially from that which would be determined using fair value at the end of the reporting period.

When an item of property, plant and equipment is revalued, any accumulated depreciation at the date of the revaluation is restated proportionately with the change in the gross carrying amount of the asset so that the carrying amount of the asset after revaluation equals its revalued amount.

When an item of property, plant and equipment is revalued, any accumulated depreciation at the date of the revaluation is eliminated against the gross carrying amount of the asset and the net amount restated to the revalued amount of the asset.

Any increase in an asset's carrying amount, as a result of a revaluation, is credited directly to a revaluation surplus. The increase is recognised in surplus or deficit to the extent that it reverses a revaluation decrease of the same asset previously recognised in surplus or deficit.

Any decrease in an asset's carrying amount, as a result of a revaluation, is recognised in surplus or deficit in the current period. The decrease is debited directly to a revaluation surplus to the extent of any credit balance existing in the revaluation surplus in respect of that asset.

The revaluation surplus in equity related to a specific item of property, plant and equipment is transferred directly to retained earnings when the asset is derecognised.

MHLONTLO LOCAL MUNICIPALITY
ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS (CONTINUED)
FOR THE YEAR ENDED 30 JUNE 2012

#### 1.1 PROPERTY, PLANT AND EQUIPMENT (continued)

The revaluation surplus in equity related to a specific item of property, plant and equipment is transferred directly to retained earnings as the asset is used. The amount transferred is equal to the difference between depreciation based on the revalued carrying amount and depreciation based on the original cost of the asset.

Property, plant and equipment are depreciated on the over their expected useful lives to their estimated residual value.

Property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses.

Property, plant and equipment is carried at revalued amount, being the fair value at the date of revaluation less any subsequent accumulated depreciation and subsequent accumulated impairment losses. Revaluations are made with sufficient regularity such that the carrying amount does not differ materially from that which would be determined using fair value at the end of the reporting period.

Any increase in an asset's carrying amount, as a result of a revaluation, is credited directly to a revaluation surplus. The increase is recognised in surplus or deficit to the extent that it reverses a revaluation decrease of the same asset previously recognised in surplus or deficit.

Any decrease in an asset's carrying amount, as a result of a revaluation, is recognised in surplus or deficit in the current period. The decrease is debited in revaluation surplus to the extent of any credit balance existing in the revaluation surplus in respect of that asset.

The useful lives of items of property, plant and equipment have been assessed as follows:

The residual value, and the useful life and depreciation method of each asset are reviewed at the end of each reporting date. If the expectations differ from previous estimates, the change is accounted for as a change in accounting estimate.

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

The depreciation charge for each period is recognised in surplus or deficit unless it is included in the carrying amount of another asset.

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset.

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in surplus or deficit when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

Assets which the municipality holds for rentals to others and subsequently routinely sell as part of the ordinary course of activities, are transferred to inventories when the rentals end and the assets are available-for-sale. These assets are not accounted for as noncurrent assets held for sale. Proceeds from sales of these assets are recognised as revenue. All cash flows on these assets are included in cash flows from operating activities in the cash flow statement.

ACCOUNTING	OCAL MUNICIPALITY POLICIES TO THE ANNUAL FINANCIAL STATEMENTS (CONTINUED) R ENDED 30 JUNE 2012
1.1 F	PROPERTY, PLANT AND EQUIPMENT (continued)
1.2	LEASES
	Municipality as lessee
	Operating leases are those leases that do not meet the definition of the Finance lease (substantially all risks and rewards associated with ownership of an asset are transferred to the municipality.) Operating leases are accrued and accounted for on a straight-line basis over the term of the relevant lease, this on the basis of the cash flows in the lease agreement. The principle of smoothing the current and future lease payments has not been applied. Notwithstanding the exemptions on the recognition of operating lease agreements, the municipality has early adopted IAS 17 (AC 105).
1.3	
	Trade and other receivables
	Trade receivables are measured at initial recognition at fair value, and are subsequently measured at amortised cost using the effective interest rate method. Appropriate allowances for estimated irrecoverable amounts are recognised in surplus or deficit when there is objective evidence that the asset is impaired. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganisation, and default or delinquency in payments (more than 30 days overdue) are considered indicators that the trade receivable is impaired. The allowance recognised is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the effective interest rate computed at initial recognised in The carrying amount of the asset is reduced through the use of an allowance account, and the amount of the deficit is recognised in
	surplus or deficit within operating expenses. When a trade receivable is uncollectible, it is written off against the allowance account for trade receivables. Subsequent recoveries of amounts previously written off are credited against operating expenses in surplus or deficit.
	Trade and other receivables are classified as loans and receivables.

## MHLONTLO LOCAL MUNICIPALITY ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 30 JUNE 2012

### 1.2 FINANCIAL INSTRUMENTS (continued)

Trade and other payables

Trade payables are initially measured at fair value, and are subsequently measured at amortised cost, using the effective interest rate method.

Cash and cash equivalents

Cash and cash equivalents comprise cash on hand and demand deposits, and other short-term highly liquid investments that are readily convertible to a known amount of cash and are subject to an insignificant risk of changes in value. These are initially and subsequently recorded at fair value.

Bank overdraft and borrowings

Bank overdrafts and borrowings are initially measured at fair value, and are subsequently measured at amortised cost, using the effective interest rate method. Any difference between the proceeds (net of transaction costs) and the settlement or redemption of borrowings is recognised over the term of the borrowings in accordance with the municipality's accounting policy for borrowing costs.

ACCOUNT	D LOCAL MUNICIPALITY ING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS (CONTINUED) 'EAR ENDED 30 JUNE 2012
1.3	INVENTORIES
	Inventories are initially measured at cost except where inventories are acquired at no cost, or for nominal consideration, then their costs are their fair value as at the date of acquisition.
	Subsequently inventories are measured at the lower of cost and net realisable value.
	Inventories are measured at the lower of cost and current replacement cost where they are held for; • distribution at no charge or for a nominal charge; or
	• consumption in the production process of goods to be distributed at no charge or for a nominal charge.
	Net realisable value is the estimated selling price in the ordinary course of operations less the estimated costs of completion and the estimated costs necessary to make the sale, exchange or distribution.
	Current replacement cost is the cost the municipality incurs to acquire the asset on the reporting date.
	The cost of inventories comprises of all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.
	The cost of inventories of items that are not ordinarily interchangeable and goods or services produced and segregated for specific projects is assigned using specific identification of the individual costs.
	The cost of inventories is assigned using the weighted average cost formula. The same cost formula is used for all inventories having a similar nature and use to the municipality.
	When inventories are sold, the carrying amounts of those inventories are recognised as an expense in the period in which the related revenue is recognised. If there is no related revenue, the expenses are recognised when the goods are distributed, or related services are rendered. The amount of any write-down of inventories to net realisable value and all losses of inventories are recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realisable value, are recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

## MHLONTLO LOCAL MUNICIPALITY ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 30 JUNE 2012

### 1.3 INVENTORIES (continued)

Until such time as the measurement period expires and inventories is recognised and measured in accordance with the requirements of the Standard of GRAP on Intangible assets, the municipality need not comply with the Standards of GRAP on: • Presentation of Financial Statements (GRAP 1),

• The Effects of Changes in Foreign Exchange Transactions (GRAP 4),

•Leases (GRAP 13),

• Segment Reporting (GRAP 18),

•Non-current Assets Held for Sale and Discontinued Operations (GRAP 100)

The exemption from applying the measurement requirements of the Standard of GRAP on Inventories implies that any associated presentation and disclosure requirements need not be complied with for inventories not measured in accordance with the requirements of the Standard of GRAP on Inventories.

### 1.4 IMPAIRMENT OF CASH-GENERATING ASSETS

Cash-generating assets are those assets held by the municipality with the primary objective of generating a commercial return. When an asset is deployed in a manner consistent with that adopted by a profit-orientated entity, it generates a commercial return.

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon

A cash-generating unit is the smallest identifiable group of assets held with the primary objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense.

Depreciation (Amortisation) is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Recoverable amount of an asset or a cash-generating unit is the higher its fair value less costs to sell and its value in use.

#### Useful life is either:

•(a) the period of time over which an asset is expected to be used by the municipality; or

• (b) the number of production or similar units expected to be obtained from the asset by the municipality.

Criteria developed by the municipality to distinguish cash-generating assets from non-cash-generating assets are as follow:

<ul> <li>15 ACCUMULATED SURPLUS An equity instrument is any contract that evidences a residual interest in the assets of an municipality after deducting all of its liabilities.</li> <li>16 PROVISIONS AND CONTINCENCIES Provisions are recognised when: <ul> <li>is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation: and</li> <li>is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation: and</li> <li>is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation: and</li> <li>is ratiable estimate can be made of the obligation.</li> <li>The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date.</li> <li>Where the effect of time value of money is malerial, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation.</li> <li>The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.</li> <li>Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is recognised when, and only when, it is virtually certain that reflecture current best estimate. The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date. Where the effect of time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation. The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is treated as a separate asset. The amount recognised for the reimbursement does not exceed the amount of the provision. The reimbursement is treated as a separate asset. The amount recognised for the reimbursement does not exceed the amount of the provision. Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation. Where discounting is used, the carrying amount of a provision increases in each period to reflect the passage of time. This increase is recognised as an interest expense. A provision is used only for expenditures for which the provision was originally recognised. Provisions are not recognised for future operating deficits. If an entity has a contract that is onerous, the present obligation (net of recoveries) under the contract is recognised and measured as a provision is a detailed formal plan for the restructuring, identifying at least:         -leas a detailed formal plan for the restructuring identifying at least:         -leas a detailed formal plan for the restructuring identifying at least:         -leas a detailed formal plan for the restructuring identifying at least:         -lea expenditures that will be undertaken; and         -when the plan will be implemented; and         -who rub plan in the		<ul> <li>the municipality has a present obligation as a result of a past event;</li> <li>it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the</li> </ul>
reporting date. Where the effect of time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation. The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is recognised when, and only when, it is vitually certain that reimbursement will be received if the municipality settles the obligation. The reimbursement is treated as a separate asset. The amount recognised for the reimbursement does not exceed the amount of the provision. Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation. Where discounting is used, the carrying amount of a provision increases in each period to reflect the passage of time. This increase is recognised as an interest expense. A provision is used only for expenditures for which the provision was originally recognised. Provisions are not recognised for future operating deficits. If an entity has a contract that is onerous, the present obligation (net of recoveries) under the contract is recognised and measured as a provision. A constructive obligation to restructure arises only when an entity:         -has a detailed formal plan for the restructuring, identifying at least:         -he activity/operating unit or part of a activity/operating unit concerned:         -he expenditures that will be undertaken; and         -when the plan will be implemented; and         -when the plan will be		
required to settle the obligation. The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is recognised when, and only when, it is virtually certain that reimbursement will be received if the municipality settles the obligation. The reimbursement is treated as a separate asset. The amount recognised for the reimbursement does not exceed the amount of the provision. Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation. Where discounting is used, the carrying amount of a provision increases in each period to reflect the passage of time. This increase is recognised as an interest expense. A provision is used only for expenditures for which the provision was originally recognised. Provisions are not recognised for future operating deficits. If an entity has a contract that is onerous, the present obligation (net of recoveries) under the contract is recognised and measured as a provision. A constructive obligation to restructure arises only when an entity:     -has a detailed formal plan for the restructuring, identifying at least:     -the activity/operating unit or part of a activity/operating unit concerned:     -the principal locations affected;     -has raided availed expection in those affected that it will carry out the restructuring by starting to implement that plan or announcing its main features to those affected that it will carry out the restructuring by starting to implement that plan or announcing its main features to those affected that it will carry out the restructuring which are those that are both:     -necessarity entailed by the restructuring; and		
<ul> <li>liability:</li> <li>Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is recognised when, and only when, it is virtually certain that reimbursement will be received if the municipality settles the obligation. ACCOUNTI	DECAL MUNICIPALITY NG POLICIES TO THE ANNUAL FINANCIAL STATEMENTS (CONTINUED) EAR ENDED 30 JUNE 2012
1.6	PROVISIONS AND CONTINGENCIES (continued)
	No obligation arises as a consequence of the sale or transfer of an operation until the municipality is committed to the sale or transfer, that is, there is a binding agreement.
	After their initial recognition contingent liabilities recognised in business combinations that are recognised separately are subsequently measured at the higher of: • the amount that would be recognised as a provision; and • the amount initially recognised less cumulative amortisation.
	Contingent assets and contingent liabilities are not recognised. Contingencies are disclosed in note 27.
1.7	REVENUE FROM EXCHANGE TRANSACTIONS
	Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.
	An exchange transaction is one in which the municipality receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of goods, services or use of assets) to the other party in exchange.
	Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.
	Measurement
	Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts and volume rebates.
	Sale of goods
	<ul> <li>Revenue from the sale of goods is recognised when all the following conditions have been satisfied:</li> <li>the municipality has transferred to the purchaser the significant risks and rewards of ownership of the goods;</li> <li>the municipality retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;</li> <li>the amount of revenue can be measured reliably;</li> <li>it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality; and</li> </ul>
14.2	the costs incurred or to be incurred in respect of the transaction can be measured reliably.      REVENUE FROM NON-EXCHANGE TRANSACTIONS
	Revenue from non-exchange transactions refers to transactions where the municipality received revenue from another entity without directly giving approximately equal value in exchange. Revenue from non-exchange transactions is generally recognised to the extent that the related receipt or receivable qualifies for recognition as an asset and there is no liability to repay the amount.
	Revenue from property rates is recognised when the legal entitlement to this revenue arises. Collection charges are recognised when such amounts are legally enforceable. Penalty interest on unpaid rates is recognised on a time proportionate basis.
	Fines constitute both spot fines and summons. Revenue from spot fines and summons is recognised when payment is received.
_	Revenue from public contributions and donations is recognised when all the conditions associated with the contribution have been met or where the contribution is to finance property, plant and equipment, when such items of property, plant and equipment qualifies for recognition and first becomes available for use by the municipality. Where public contributions have been received but the municipality has not met the related conditions, a deferred income (liability) is recognised.

Contributed propety, plant and equipment is recognised when such items of property, plant and equipment qualifies for recognition and become available for use by the municipality.

Revenue from the recovery of unauthorised, irregular, fruitless and wasteful expenditure is based on legislated procedures, including those set out in the Municipal Finance Act (Act No.56 of 2003) and is recognised when the recovery thereof from the responsible coincillors or officials is virtually certain.

#### Rendering of services

When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue associated with the transaction is recognised by reference to the stage of completion of the transaction at the reporting date. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

• the amount of revenue can be measured reliably;

• it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality;

- the stage of completion of the transaction at the reporting date can be measured reliably; and
- the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

When services are performed by an indeterminate number of acts over a specified time frame, revenue is recognised on a straight line basis over the specified time frame unless there is evidence that some other method better represents the stage of completion. When a specific act is much more significant than any other acts, the recognition of revenue is postponed until the significant act is executed.

When the outcome of the transaction involving the rendering of services cannot be estimated reliably, revenue is recognised only to the extent of the expenses recognised that are recoverable.

Service revenue is recognised by reference to the stage of completion of the transaction at the reporting date. Stage of completion is determined by .

Interest, royalties and dividends

Revenue arising from the use by others of entity assets yielding interest, royalties and dividends is recognised when: • It is probable that the economic benefits or service potential associated with the transaction will flow to the municipality, and • The amount of the revenue can be measured reliably.

Interest is recognised, in surplus or deficit, using the effective interest rate method.

Royalties are recognised as they are earned in accordance with the substance of the relevant agreements.

Dividends, or their equivalents are recognised, in surplus or deficit, when the municipality's right to receive payment has been established.

Service fees included in the price of the product are recognised as revenue over the period during which the service is performed.

#### 1.8 TURNOVER

Turnover comprises of sales to customers and service rendered to customers. Turnover is stated at the invoice amount and is exclusive of value added taxation.

#### **1.9 INVESTMENT INCOME**

Investment income is recognised on a time-proportion basis using the effective interest method.

#### 1.10 BORROWING COSTS

It is inappropriate to capitalise borrowing costs when, and only when, there is clear evidence that it is difficult to link the borrowing requirements of an entity directly to the nature of the expenditure to be funded i.e. capital or current. Borrowing costs are recognised as an expense in the period in which they are incurred.

## 1.11 COMPARATIVE FIGURES

Where necessary, comparative figures have been reclassified to conform to changes in presentation in the current year.

### 1.12 UNAUTHORISED EXPENDITURE

Unauthorised expenditure means:

• overspending of a vote or a main division within a vote; and

 expenditure not in accordance with the purpose of a vote or, in the case of a main division, not in accordance with the purpose of the main division.

All expenditure relating to unauthorised expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

#### 1.13 FRUITLESS AND WASTEFUL EXPENDITURE

Fruitless expenditure means expenditure which was made in vain and would have been avoided had reasonable care been exercised. All expenditure relating to fruitless and wasteful expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

#### 1.14 IRREGULAR EXPENDITURE

Irregular expenditure as defined in section 1 of the PFMA is expenditure other than unauthorised expenditure, incurred in contravention of or that is not in accordance with a requirement of any applicable legislation, including - •(a) this Act: or

• (b) the State Tender Board Act, 1968 (Act No. 86 of 1968), or any regulations made in terms of the Act; or

•(c) any provincial legislation providing for procurement procedures in that provincial government.

National Treasury practice note no. 4 of 2008/2009 which was issued in terms of sections 76(1) to 76(4) of the PFMA requires the following (effective from 1 April 2008):

Irregular expenditure that was incurred and identified during the current financial and which was condoned before year end and/or before finalisation of the financial statements must also be recorded appropriately in the irregular expenditure register. In such an instance, no further action is also required with the exception of updating the note to the financial statements.

Irregular expenditure that was incurred and identified during the current financial year and for which condonement is being awaited at year end must be recorded in the irregular expenditure register. No further action is required with the exception of updating the note to the financial statements.

Where irregular expenditure was incurred in the previous financial year and is only condoned in the following financial year, the register and the disclosure note to the financial statements must be updated with the amount condoned.

#### 1.14 IRREGULAR EXPENDITURE (continued)

Irregular expenditure that was incurred and identified during the current financial year and which was not condoned by the National Treasury or the relevant authority must be recorded appropriately in the irregular expenditure register. If liability for the irregular expenditure can be attributed to a person, a debt account must be created if such a person is liable in law. Immediate steps must thereafter be taken to recover the amount from the person concerned. If recovery is not possible, the accounting officer or accounting authority may write off the amount as debt impairment and disclose such in the relevant note to the financial statements. The irregular expenditure register must also be updated accordingly. If the irregular expenditure has not been condoned and no person is liable in law, the expenditure related thereto must remain against the relevant programme/expenditure item, be disclosed as such in the note to the financial statements and updated accordingly in the irregular expenditure register.

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), and the Public Office Bearers Act (Act No. 20 of 1998) or is in contravention of the economic entity's supply chain management policy. Irregular expenditure excludes unauthorised expenditure. Irregular expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

#### 1.15 USE OF ESTIMATES

The preparation of annual financial statements in conformity with Standards of GRAP requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the municipality's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the annual financial statements are disclosed in the relevant sections of the annual financial statements. Although these estimates are based on management's best knowledge of current events and actions they may undertake in the future, actual results ultimately may differ from those estimates.

## 1.16 PRESENTATION OF CURRENCY

These annual financial statements are presented in South African Rand.

Some projects were started at the end of the financial year since the funding was received late and in trenches. On the Tsitsa project it has got phases that are followed and only one phase has started although funds were

already received the other phases will commence after the finalisation of this phase.

DEFERRED INCOME		R	R
UNKNOWN DEPOSITS		400 400	
MUNICIPALITY IS EMBARKING ON WAYS TO IDENTIFY SOURCE OF REVENUE	_		

MUNICIPALITY IS EMBARKING ON WAYS TO IDENTIFY SOURCE OF REVENUE REVENUE WILL BE RECONSED WHEN SOURCE IS KNOWN

#### 34 GOING CONCERN

33

The municipality has had a good history of making profit in the past financial years. There is also no evidence that the municipality will be put under administration, as no there is an indication of discontinuance of National Treasury in giving equitable share to Mhlontlo Municipality.

#### 35 EVENTS AFTER THE REPORTING DATE

All events were tested and there were no adjustable events after balance sheet date

#### 36 RELATED PARTY DISCLOSE

The related parties are councillors and section 57 managers
